Home Page	Enabled	 

Configuration

1. In case you do not have a Shiptimize or PakketMail account, click to request an account. Fill in your data and our team will contact you shortly after.

The screenshot displays the OpenCart administration interface for the Shiptimize module. On the left is a dark navigation sidebar with the OpenCart logo and menu items: Dashboard, Catalog, Extensions (highlighted with a red dot), Marketplace, Installer, Extensions (highlighted with a red dot), Modifications, Events, Design, Sales, Customers, Marketing, System, and Reports. At the bottom of the sidebar are three progress bars: Orders Completed (0%), Orders Processing (0%), and Other Statuses (0%).

The main content area is titled 'Shiptimize Settings' with a breadcrumb trail 'Home > Modules > Shiptimize'. In the top right corner, there is a user profile for 'John Doe' and a 'Logout' link. Below the title bar, there is a blue button with a document icon and a refresh arrow, with a red arrow labeled '5' pointing to it. Below this is a section titled 'Create a Shiptimize Account' containing the text 'If you do not have a Shiptimize account [Click Here](#)', with a red arrow labeled '1' pointing to the link. Below this section are three input fields for 'Public Key', 'Private Key', and 'Gmaps Key'. At the bottom, there is a 'Status for export preset' section with a list of checkboxes: Canceled, Canceled Reversal, Chargeback, Complete, Denied, Expired, Failed, Pending, Processed, Processing (checked), Refunded, Reversed, Shipped, and Voided.

2. Login to your Shiptimize or PakketMail account and create a Public and Private key via “**Key Management**” or “**Sleutelbeheer**”
3. Copy the Public and Private keys in the Plugin settings at OpenCart
4. Select under “**Export all**” which types of order statuses are used for shipments that are ready to be send
5. Click “**Save**”. When inputting valid keys, the plugin will create new shipping methods for every available carrier in your Shiptimize or PakketMail account in OpenCart.

Note: Each installation should have one set of keys. If you have more than one shop, please generate one pair of keys for each shop

Carrier Configuration

1. Go to “Extensions” > “Extensions”
2. Select “Shipping”
3. Find the method you want to enable
 - 3.1. Install
 - 3.2. Edit

General Settings

The screenshot displays the OpenCart admin interface. On the left is a dark navigation sidebar with the following menu items: NAVIGATION, Dashboard, Catalog, Extensions (highlighted), Marketplace, Installer, Modifications, Events, Design, Sales, Customers, Marketing, System, and Reports. The top header features the OpenCart logo, a user profile for 'John Doe' with a dropdown arrow, and a 'Logout' button. The main content area is titled 'CTT' and contains an 'Edit' button. Below this are several form fields:

- Title:** Text input field containing 'Title for Buyer User'.
- Cost:** Text input field containing '10 - cost in your currency'.
- Tax Class:** Dropdown menu with 'Taxable Goods' selected.
- Geo Zone:** Dropdown menu with 'All Zones' selected.
- Status:** Dropdown menu with 'Enabled' selected.
- Sort Order:** Text input field containing 'Sort Order'.

At the bottom of the page, the footer text reads: 'OpenCart © 2009-2019 All Rights Reserved.'

Title: The name that will be shown to your customer

Cost: A number, how much you want to charge your customer for this method.

Tax Class: if this method is taxable

Geo Zone: In which geographical areas should this method be available

Status: Enabled - will show this method to your customer when the shipping address matches the geo zones you choose above.

Automated updates between Shiptimize / PakketMail and OpenCart

As soon as a shipping label is created from your shipping dashboard, a tracking number is automatically generated. This tracking number is automatically updated in your OpenCart store and associated with the correct order.

Order History

Order Details	
Order ID: #2 Date Added: 23/05/2019	Payment Method: Cash On Delivery  Pickup Point: parcelShop: R.Vice-Alm. Azevedo Coutinho 11, Amadora 2700-843  TrackingId: theTrackingID Shipping Method: DHL Parcel

Additionally, from your Shiptimize account (**Settings > Connect > Shop details**) or from your PakketMail account (**Settings > Shops**) you can set in which moment(s) order statuses in your OpenCart backend should be updated.

You can select to update when (1) an order is imported into your shipping dashboard, (2) a shipping label has been printed, (3) the shipment has been delivered.

The Checkout for your customer incl. Pickup locations

After installation and configuration, according to the steps provided above, all enabled carriers are offered as shipping options to your customer in the checkout.

If a carrier provides a service to directly deliver to a Pickup Location, a button will be added to the checkout, allowing the user to select their preferred location.

Step 4: Delivery Method ▾

Please select the preferred shipping method to use on this order.

CTT

CTT - \$10.00

DHL Parcel

DHL Parcel - \$10.00

[Choose Pickup Location](#)

As soon as your customer clicks “**choose pickup location**”, we will display a map (Google Maps in case you’ve entered a Google Maps key in plugin configuration.

Otherwise an OpenStreetMap including the nearest Pickup Locations.

Return policy (edit with Customer Insurance module)

Export Orders

In case you want to export orders to create shipping labels, we offer two options to do so:

1. **Export pre-set order statuses:** Click this option to export all orders that were not exported before and have an order status that you configured in your Plugin settings after **“Export all”**;
2. **Export selected orders:** Click this option to send any selected order regardless of status to your shipping dashboard. This allows you to re-export orders if you deleted them in the platform. If you try to re-export an order that is already in the platform, it will be refused, based on an already existing order number.

Update new carriers in OpenCart

In case new carriers are activated in your shipping dashboard after you have installed and configured your OpenCart, and you want to add those carriers in your OpenCart, go over to “**Configuration**” and save the settings.

Every time you do this, the plugin will ask the app which carriers are activated and update the plugin settings.
